Bona Remover

Technical data sheet

Professional
Floor Care

Bona Remover is a concentrated, liquid polish remover (stripper) designed for the removal of polish build up. The formulation is balanced to be tough on polish and gentle on wood to reduce the risk of stains. In addition to removing polish it is also effectively removes scuff marks. Adapted for wood but possible to use on most types of water-resistant floorings including tiles, vinyl and linoleum floors.

- Specifically designed for varnished wooden floors
- Effective on Bona Polish and many other types of polish
- Removes scuff marks

Technical data

pH-value:	Concentrate approx. 12,5 Working solution: 11
Dilution:	1 litre to 5 litres of water (16,7%)
Safety:	Irritant, see safety data sheet for more information.
Flash point:	Non-flammable
Shelf life:	At least 2 years, from the date of production, in unopened original container
Storage / transport:	Store frost free.
Pack size:	3 x 5 litres (44 boxes per pallet) 10 x 1 litres (50 boxes per pallet)

Preparations

Remove loose dust/grit etc using a vacuum cleaner, scissor mop or other dry cleaning method.

Application

1. Apply the diluted product to a section of the floor using a mop or spray equipment. Allow the solution approx. 5 minutes to dissolve the polish.
2. Scrub the section using a buffing machine equipped with a red pad.
3. Directly remove the dissolved polish with a mop and a bucket of clean water (alternatively step 2 & 3 can be carried out using an autoscrubber).
4. It may be necessary to apply Bona Remover several times depending on how thick the polish build up is.
5. When the entire floor has been treated, clean once more with only pure water. It is important that all traces of Bona Remover are removed before applying a new layer of polish.

Note: The amount of water applied to the floor must be kept to a minimum. Pay attention to large gaps in the floor, do not allow excessive amounts of cleaning solution to seep into open gaps.

Removal of scuff marks

Apply the diluted product to the scuff mark or the affected area. After a few minutes scrub with a gentle non-abrasive scouring pad (white or red pad) and wipe off.
